

ETERNITYTM
DUAL MOBILITY HIP SYSTEM

CoCr-Free Titanium Platform
Vitamin E Bearing Technology

Enhanced Stability

Eternity Dual Mobility System

Eternity Dual Mobility System implants are designed to enhance stability and reduce the risk of dislocation.

■ Titanium (Ti6Al4V) Plasma Cementless Acetabular Cup

- CoCr Free (Titanium-Titanium Taper) with Ti-A Titanium Plasma Spray Coating
- Color coding at the equatorial rim
- Available in sizes 44-62 mm in 2 mm intervals

■ Vitamin-E Liner

To minimize wear and increase longevity

■ Titanium (Ti6Al4V) Liner Adapter – TiNbN Coated

TiNbN coating minimizes the risk of metal allergy and ensures a safer Titanium-to-Titanium connection with the shell

■ Ceramic/CoCr Heads

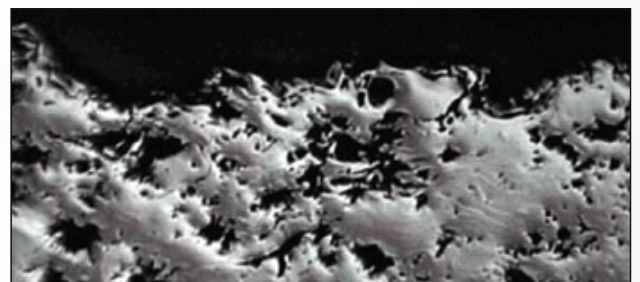

Multiple head diameters and offsets optimizing sphericity and tolerance for smooth articulation

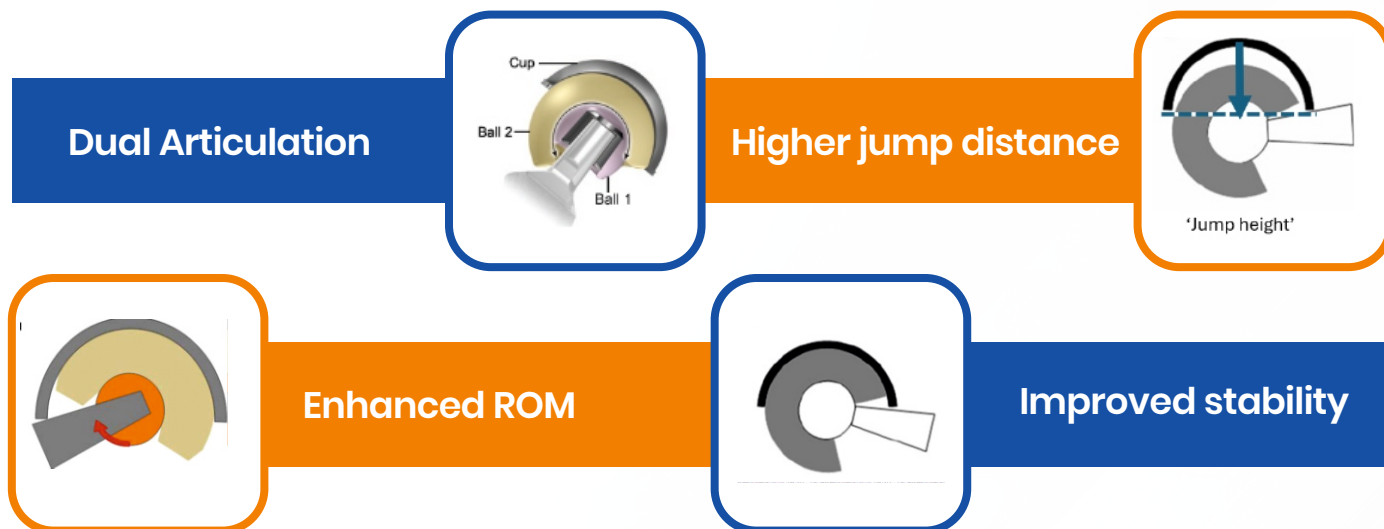

Titanium Acetabular Shell Coating

Ti-A Titanium plasma spray coating is applied using an Atmospheric Plasma Spray (APS) process

Thickness	150-350 µm
Adhesion strength	≥30 Mpa
Porosity	20-40%
Roughness (Rt)	90-170 µm

Why Dual Mobility Matters?

Why Choose **ETERNITY™** Dual Mobility?

Features	Benefits
CoCr-Free Design	Helps eliminate concerns associated with cobalt-chromium metallosis
Vitamin E Polyethylene	Designed to reduce wear and improve oxidative stability
TiNbN Liner Adapter	Helps reduce metal allergy concerns while supporting enhanced biocompatibility
Color-Coded Instrumentation	Enables surgical workflow efficiency and easier intraoperative identification

Simplified Surgical Workflow

Efficient instrumentation with Color Coding at the equatorial rim for an easy surgical work flow, matching trials and packaging.

Compatibility Chart

Acetabular Cup System Compatibility	Acetabular Cup	TINBIN INLAY	VIT-E POLY Liner	Head
	44 mm	36 mm	36 mm	22 mm
	46 mm			
	48 mm			
	50 mm	40 mm	40 mm	28 mm
	52 mm			
	54 mm	42 mm	42 mm	28 mm
	56 mm			
	58 mm	44 mm	44 mm	28 mm
	60 mm			
	62 mm
